

## VITALS 2027 Preliminary Programme

Thursday 11<sup>th</sup> March 2027

| Time        | Session                                                                    | Talk                                                                      |
|-------------|----------------------------------------------------------------------------|---------------------------------------------------------------------------|
| 10:00-10:30 | Registration and Coffee                                                    |                                                                           |
| 10:30-10:40 | Welcome and Introduction                                                   |                                                                           |
| 10:40-11:30 | (State-of-the-Art) Chronic Limb Threatening Ischemia (CLTI)                | Is the shift to Sirolimus overdue?                                        |
|             |                                                                            | Vessel preparation; treating the lesion, not the angiogram!               |
|             |                                                                            | Why CLTI interventions fail: Anatomy, biology or technique?               |
| 11:30-12:20 | (State-of-the-Art) Aortic Dissection                                       | Trials update                                                             |
|             |                                                                            | Proximal landing zone; device and technical approach                      |
|             |                                                                            | Distal landing zone/STABILISE technique vs TEVAR only/oversizing & length |
| 12:20-12:40 | Industry Sponsored Symposium                                               |                                                                           |
| 12:40-13:35 | Lunch                                                                      |                                                                           |
| 13:35-14:25 | State-of-the-Art) Chronic Venous Occlusion; Revascularisation - Hot Topics | Trials update                                                             |
|             |                                                                            | Deep venous stenting - choosing the right patient and right technique     |
|             |                                                                            | Deep venous stenting - how to address durability issues                   |
| 14:25-15:10 | Industry Sponsored Workshop                                                |                                                                           |
| 14:25-15:10 | Industry Sponsored Workshop                                                |                                                                           |
| 15:10-16:00 | (State-of-the-Art Technology) Complex Aortic Interventions                 | The case for RCT                                                          |
|             |                                                                            | Inner vs outer branches BEVAR                                             |
|             |                                                                            | Bridging stent; has the dilemma been resolved?                            |
|             |                                                                            | When fEVAR is preferred over BEVAR?                                       |
| 16:00-16:30 | Coffee Break                                                               |                                                                           |
| 16:30-16:50 | Industry Sponsored Symposium                                               |                                                                           |
| 16:50-18:00 | Video Recorded Cases (Peripheral)                                          |                                                                           |
| 18:00-18:40 | (State-of-the-Art) Carotid Stent                                           | The current evidence in asymptomatic stenosis                             |
|             |                                                                            | Stent versus endarterectomy neurologist view                              |
|             |                                                                            | Carotid stents; how current technology has improved safety                |
| 18:40-19:30 | Break and Check-in                                                         |                                                                           |
| 19:30-20:30 | Abstract Competition Awards Ceremony                                       |                                                                           |
| 20:30-23:30 | Dinner                                                                     |                                                                           |

Friday 12<sup>th</sup> March 2027

| Time        | Session                                                                                                     | Talk                                                                                        |
|-------------|-------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| 08:10-08:15 | Introduction to Day Two                                                                                     |                                                                                             |
| 08:15-09:00 | (State-of-the-Art) Health Economics                                                                         | Cost effectiveness analysis - how & why!                                                    |
|             |                                                                                                             | Quality of Life analysis - how and why!                                                     |
|             |                                                                                                             | How new devices can be integrated based on cost and QOL analysis                            |
| 09:00-09:45 | (State-of-the Art) Advanced embolisation - Complex Visceral Aneurysms                                       | Technical tips to optimise success and safety in complex anatomy                            |
|             |                                                                                                             | Liquid versus absorbable vs permanent particles                                             |
|             |                                                                                                             | Evidence generation; is sham trial the only way?                                            |
| 09:45-10:05 | Industry Sponsored Symposium                                                                                |                                                                                             |
| 10:05-10:30 | Coffee Break                                                                                                |                                                                                             |
| 10:30-11:15 | (Case based discussion) Diabetic Foot -From angiographic success to limb salvage                            | Crural vessel recoil - clinical implications and mitigating strategies?                     |
|             |                                                                                                             | Foot perfusion beyond angiographic success; what are we missing                             |
|             |                                                                                                             | Distal bypass - when should it be first option?                                             |
| 11:15-12:00 | Industry Sponsored Workshops                                                                                |                                                                                             |
| 11:15-12:00 | Industry Sponsored Workshops                                                                                |                                                                                             |
| 12:00-12:20 | Industry Sponsored Symposium                                                                                |                                                                                             |
| 12:20-13:15 | Lunch                                                                                                       |                                                                                             |
| 13:15-14:00 | Training in vascular IR's: Barriers to clinical training, expanding recruitment, opportunities and hurdles. | Quality of clinical training in IR; what is missing?                                        |
|             |                                                                                                             | How can we balance between training time and skill acquisition? -                           |
|             |                                                                                                             | Developing research skills during training time; opportunities and challenges               |
|             |                                                                                                             | nontechnical skills training; how it should be and how can we speed up adoption             |
| 14:00-14:55 | Video recorded cases (Aorta)                                                                                |                                                                                             |
| 14:55-15:15 | Coffee Break                                                                                                |                                                                                             |
| 15:15-16:00 | (State-of-the-Art Technology) EVAR Outside comfort Zone; Exploring Tools for Complex Decision Making        | Hostile neck; when should we say yes or no for endovascular approach                        |
|             |                                                                                                             | Rupture AAA and hostile anatomy; algorithm and how far we can push the envelope             |
|             |                                                                                                             | Bell bottom, internal iliac embolisation of branched iliac stent; can we rationale approach |

|             |                                                                  |                                                                                                      |
