**Centre for Anatomy &
Human Identification**

2017 BSIR Advanced Practice Course

14th—15th June 2017

Course Content :

This course is aimed at Senior IR Trainees and Consultant at the beginning of their career.

1. **Clinical Sessions:** These will be dedicated to the use of different techniques and hands on stations by experience senior UK wide faculty. Case based discussion will be used appropriately.
2. **Simulation with Thiel Cadavers :** This simulation will include endovascular techniques. The Cuschieri Skills Centre has pioneered the use of Thiel embalmed cadavers in Interventional Radiology and this is a unique facility in the UK. Using a cardiac pump, flow is achieved in the arteries of the cadaver and endovascular procedures can be simulated in a lifelike fashion.
3. **Simulators:** A variety of computerised simulators will be available for the delegates to learn different IR techniques. Simulators for EVAR deployment, angioplasty and stenting along with embolization techniques will be available.
4. **Clinical Scenarios Training :** A series of clinical skills scenarios will be integrated into the course. This will include clinical simulators for emergency training as well as outpatient based consulting rooms with actors.
